

● VARIANT

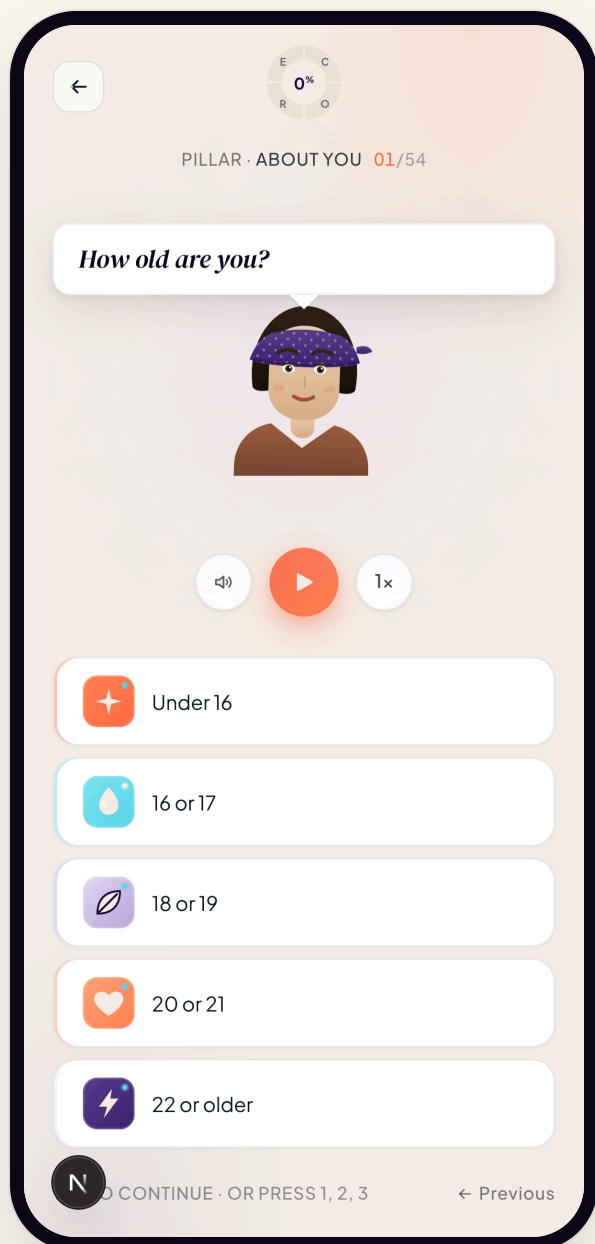

Light-mode *questions.*

A previous direction we shipped to v1 — the question screens switched to a cream surface inside an otherwise dark assessment shell. Captured here for the client to compare with the current night-surface flow.

01 How it *feels*.

LIGHT-MODE QUESTIONS

A quieter *reading room*.

V1 used the dark plum surface for everything around the assessment — start, intro, the Contract of Honesty — but switched to a **cream surface specifically inside the question screens**. The result is an editorial reading experience: long-form question text sits on a soft cream card, answer pills carry their own colored icon, and Kai stays as a small character anchor rather than the dominant presence.

WHAT'S DIFFERENT FROM THE V2 NIGHT FLOW

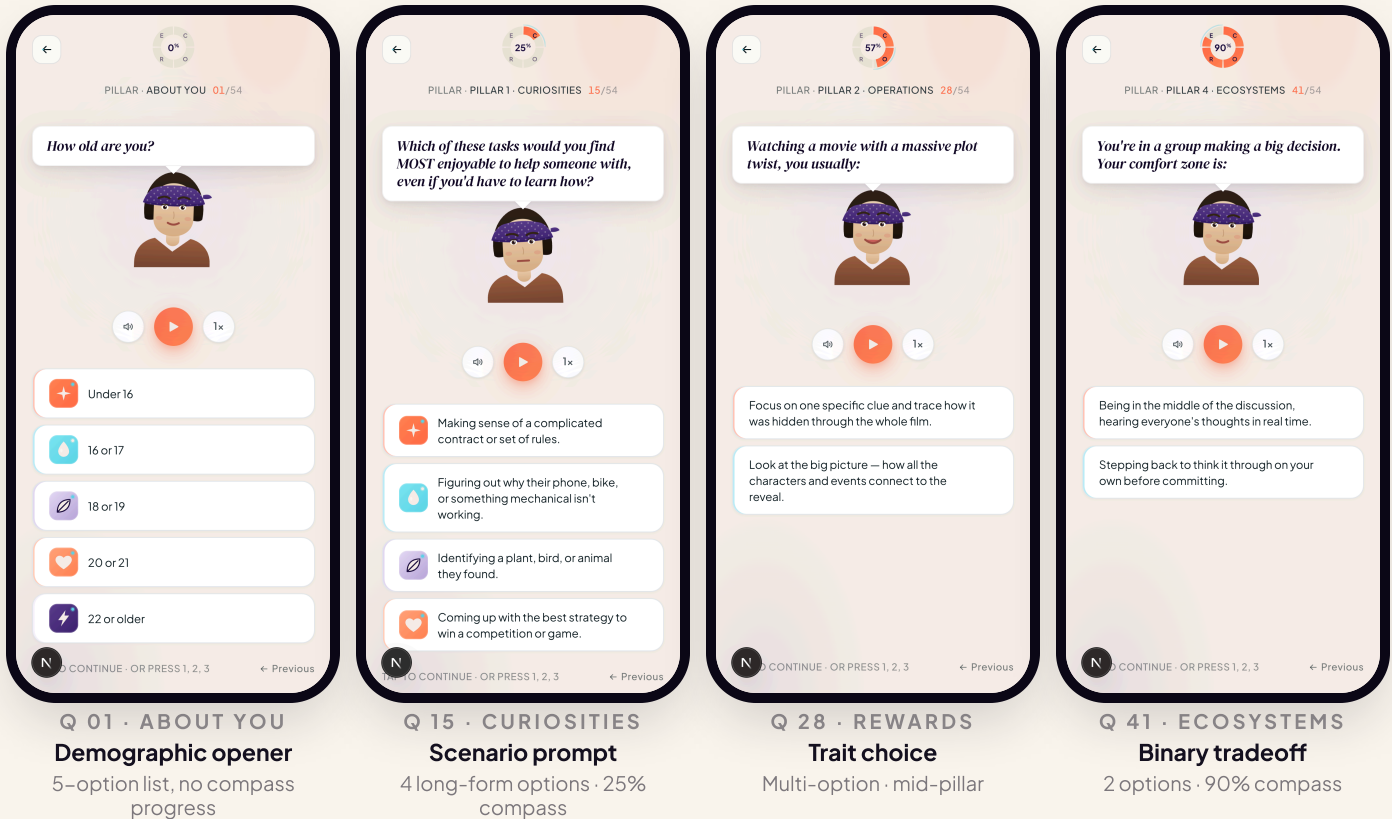

- **Surface** · cream paper, ink type.
- **Question card** · serif italic on a tall pill, not a speech bubble with a tail.
- **Answer pills** · each has a colored icon tile (coral plus, cyan drop, lavender leaf, blush heart, plum lightning) on white.
- **Audio row** · coral play button, neutral mute and speed pills.
- **Compass** · top-center, small coral wedge fills with progress.

THE ARGUMENT FOR IT

The questions are the slow, considered part of the journey. A cream surface signals "this is reading time" — different register from the ceremony that surrounds it.

Variety across *question types*.

Four captures showing how the light surface holds up across question shapes — from short-form demographic openers to multi-line scenario prompts and binary-choice tradeoffs.

WHAT STAYS CONSISTENT ACROSS ALL SIX

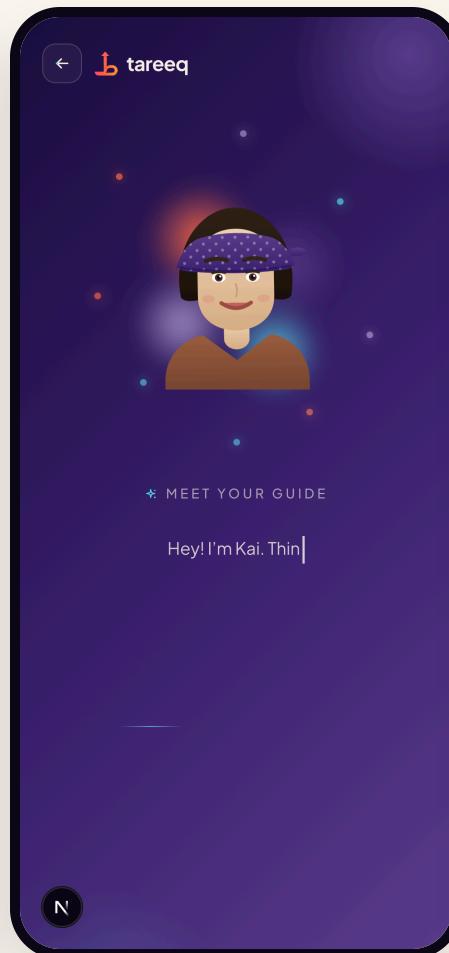

The compass in the header, the pillar label eyebrow, the cream question card with serif italic, the coral play button anchoring the audio row, and the white answer pills with their tone-coded icon tiles on the left. The system holds together visually whether the question is two options or five.

Where light *sits* in the v1 flow.

The light surface was a deliberate *moment*, not the whole product. Start, intro, and the Contract of Honesty all stayed on the plum surface. The cream only opened at the first question and closed at the last — like a room you stepped into to think, then stepped out of.

/ START
Dark plum
Career success · ladder of 3 steps

/ INTRO
Dark plum
Meet your guide · typewriter Kai intro

/ CONTRACT
Dark plum
CORE Contract of Honesty

COMPARISON VS CURRENT V2 PRODUCTION

V2 (live at) is night surface throughout the entire flow — including the question screens. The compass moves to the header, Kai grows to 120px, the question bubble keeps a cream card but on the dark surrounding chrome. The light-mode variant in this document is archived on the branch and is still reachable for client demo.
